## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by publication DE 2751667.

Publication DE 2751667 discloses a monocrystalline semiconductor substrate 2 shown in Figure 1. An insulation layer 8 is arranged on a surface of the semiconductor substrate 2. A contact hole 10 penetrates the insulation layer. A contact structure 12 contacts the substrate through the contact hole. The contact structure is aluminum, which is soluble in an anisotropic dissolving process. The edges of the contact hole include diffusion stop structures in the form of (111) surfaces which prevent aluminum from spreading into the semiconductor material.

### ***Allowable Subject Matter***

Claims 12 - 16, 18 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
